EXPERTISE SKILLS

- **Programming Languages :** C, C++, Python, Java
- **Web Development :** HTML, CSS, JavaScript, React.js, PHP, Node.js, Express.js
- **UI/UX Design :** Figma, Canva
- **Database Management :** SQLite, MySQL, MongoDB
- **Machine Learning & AI :** TensorFlow, PyTorch
- **Other Tools & Technologies :** Visual Studio Code, LaTeX, Google Colab, Git, GitHub

LANGUAGE

- English
- Malayalam
- Hindi

CERTIFICATIONS

- DataScience with Python Workshop
- Cybersecurity and Ethical Hacking Workshop
- Basics of AutoCAD & SketchUp Workshop
- Augmented Reality Workshop
- Self Driving Electric Vehicles
- NxtCode 7 Under 7 Challenge
- Dynamic Web Application (JavaScript)
- Project Training Certification in PDMG, ISRO

ORGANIZATIONS

- Game Development Club (GDC)
- Google Development Students Club (GDSC)
- Innovation and Entrepreneurship Development Centre (IEDC)
- TinkerClub
- National Service Scheme (NSS)

01 PROFESSIONAL PROFILE

Software Developer with a strong foundation in full-stack development, AI, Machine Learning, and Deep Learning. Skilled in Python, JavaScript, TensorFlow, SQL, and modern web technologies. Gained real-world experience through internships at ISRO and Cochin Shipyard, contributing to production-focused software and AI solutions. B.Tech CSE graduate focused on quality, efficiency, and continuous growth as a developer.

02 EDUCATION

- **Bachelor of Technology in Computer Science and Engineering with Minor Degree in Electronics and Communication**
  MESCET, KUNNUKARA, APJ Abdul Kalam Technological University (2021–2025)
  CGPA : 7.58
- **Higher Secondary Education- Integrated Science**
  MTHSS, Kaprasserry (2019-2021)
  Percentage : 93%
- **Secondary Education- THSLC**
  MTHSS, Kaprasserry (2019)
  Percentage : 89%

03 EXPERIENCE

Process Associate, CEE CEE Solutions 2026 – Present

Supported machine learning projects by preparing, validating, and organizing high-quality training datasets for ML model development. Ensured data accuracy, consistency, and adherence to project quality standards while coordinating with requirements and delivery workflows.

Project Internship at URSC, ISRO, Bangalore Dec 2024 – Feb 2025

Worked in the PDMG division at ISRO–URSC on satellite image classification, optimizing deep learning models using NAS and applying quantization for efficient deployment on edge devices such as FPGAs.

Internship at Information Systems Department, Cochin Shipyard Limited Aug 2024 - Aug 2024

Developed data management solutions, including no-code platforms, entry forms, student registration, and automation systems to enhance operational efficiency.

Website Management & Admin Panel Handling, Navjeevana Aug 2024 - Jan 2025

Handled product updates, user accounts, content management, and blog writing. Managed data and optimized website functionality for a better user experience.

04 PROJECTS

OPTIMIZATION OF CNN MODELS FOR EFFICIENT DEPLOYMENT

Worked on basic CNN image classification architectures using the EuroSAT dataset. Designed and trained custom models, applied Neural Architecture Search (NAS) to improve accuracy, and performed model quantization for efficient hardware implementation.

HANDWRITEBOT

Developed an AI-powered system to convert text and voice inputs into personalized handwritten content with style replication, voice recognition, and precise motor control.

FIXFASTLANE

Developed a website to help users find mechanics and petrol pumps in remote areas, focusing on user-friendly design and effective search functionalities.
